## Objective

I am a recent graduate of an associates degree in computer science and now focused on starting my front end development career. I am interested in this industry because I want to create apps and software that provide an effective user experience to individuals and companies. Currently, I'm working on developing apps that are useful for everyday life..

## Education

### **Associate of Science in Computer Science | June 2022 | Austin Community College**

- GPA: 3.54
- Computer organization/machine language
- Programming fundamentals
- Data structures with C++

## Skills & Abilities

### **Mobile App Development with React Native**

- Javascript app development with React Native and Expo libraries.
- Make REST API calls.

### **Python and C++ Programming Languages**

- Experienced with Python and C++ syntax, data structures, and objects.
- Python packages such as NumPy and Pandas.

### **UI/UX Design**

- Utilized Figma, Affinity Designer, and React Native tools to create UI/UX components and prototypes.

## Experience

### **Weather Tips App | Personal Project | July 2022**

- Displays helpful information about the user's local weather and safety tips for severe weather conditions.
- Created icons for weather conditions and weather details.
